The main concept of this workshop is two-fold. One is to bring out the correlation of power relations between different groups, cultures or people. It addresses the problems and consequences of the decolonized countries, especially questions relating to political and cultural independence of formerly subjugated people and themes such as racialism and colonialism.

Second, is to address the needs of the modern day teachers in terms of English Language Techniques (ELT) and uplift the students accordingly. The ELT inputs focus on the different strategies that includes learning about varied teaching methods in terms of teaching English in their class rooms analyzing the challenges and opportunities encountered by the teachers of English.

The focus of the conference is to highlight the significance of scientific innovations of our society. The Resource persons emphasized and enlightened scientific inventions and discoveries paved the way for the development of humanity and not for the destruction nature. They encourage and insist on young women Research aspirants should do research in Tamil and in their mother tongue. New young scientists should find a scientific technique to eliminate global- warming.

One third of our population is getting good drinking water. 80% of Electricity is derived from coal. This causes environmental pollution instead, we generate electricity from solar and wind power which enables us to get fulfillment without pollution.

They illuminated how different types of waste (ex) Electronic waste, medical waste and plastic wastes are spoiling our environment. They also insist that every one of us is responsible for perfecting our environment.

More than 100 researchers submitted their articles through power point presentation and poster presentation on the topics of Electricals, Electronics, Biology, Bio-chemistry, Bio-technology, Bio-Physics, Astronomy, Agriculture, Organic Chemistry, Inorganic Chemistry, Analytical Chemistry, Industrial Chemistry, Health Care, Medicine, Etc.,

The focus of the conference is to highlight the significance of scientific innovations of our society. The Resource persons emphasized and enlightened scientific inventions and discoveries paved the way for the development of humanity and not for the destruction nature. They encourage and insist on young

women Research aspirants should do research in Tamil and in their mother tongue. New young scientists should find a scientific technique to eliminate global-warming. One third of our population is getting good drinking water. 80% of Electricity is derived from coal. This causes environmental pollution instead, we generate electricity from solar and wind power which enables us to get fulfillment without pollution. They illuminated how different types of waste (ex) Electronic waste, medical waste and plastic wastes are spoiling our environment. They also insist that every one of us is responsible for perfecting our environment.

More than 100 researchers submitted their articles through power point presentation and poster presentation on the topics of Electricals, Electronics, Biology, Bio-chemistry, Bio-technology, Bio-Physics, Astronomy, Agriculture, Organic Chemistry, Inorganic Chemistry, Analytical Chemistry, Industrial Chemistry, Health Care, Medicine, Etc.,

The Department of Commerce of our College has organized a one day seminar entitled “Crisis in Indian industries – Issues, Challenges and Opportunities” on 31.01.2020 in our college campus. Dr. J. Josephine Daisy, HOD of Commerce with computer Applications, Mahendra College of Arts and Science (Autonomous), Kalipatti, Tiruchengode Taluk, Namakkal district was the resource person.

India is the world’s fourth – largest economy. India population is growing 14% per decade, leading to problems that include food deficits, pollution and unemployment. The living standards of most citizens are not changing. Over 30% of population is living below the international poverty line. India has many well educated technically workers. However, we could not properly utilize them for our nation’s growth. We must perfectly utilize our 5M’s (Money, Men, Machine, Material and Methods), she pointed out.
