Intellectual Property Rights (IPR) refers to the legal rights given to the inventor or creator to protect his/her invention or creation for a certain period of time. IPR have been defined as ideas, inventions and creative expressions based on which there is a public

willingness to bestow the status of property. IPR provides certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. Patent is recognition for an invention, which satisfies the criteria of global novelty, non-obviousness and industrial application. IPR is a prerequisite for better identification, planning, commercialization, rendering and thereby protection of invention or creativity.

Each industry should evolve its own IPR policies, management style, strategies for depending on its area of specialty. Dr. S. Enhancement of Student's Intelligence Programme

The College enables the students during their course, develop leadership skills, increase personality traits and strengthen intelligence through motivation for individual talent and to go rid of stage fear. Most of the students take active part in such programmes and they mould themselves to handle classes for their batch mates and juniors. Concurrently they achieve self-growth besides the university syllabi in addition. On this subject, the following students of our College have actively taken part in that ESI Programme.
