NAAN MUDHALVAN FOR ALL UG FIRST YEARS
AN OVERVIEW OF ENGLISH LANGUAGE COMMUNICATION

2024-2025 EVEN SEMEMSTER

Overview of English Language Communication I Year -Final Exam Questions Level 1 to Level 3 - Basic Proficiency

1. Scenario 1: Booking a Train Ticket

Use Case:

Rahul and his friends are planning a weekend trip to Chennai. They arrive at the railway station to book their tickets. Rahul wants a window seat, Priya, a student, is hoping for a discount, Arun has never travelled by train and is confused, while Kavya is worried about cancellation policies. The group approaches the ticket counter and interacts with the ticket clerk to finalize their journey.

2. Scenario 2: Returning a Wrong Product to a Store

Use Case:

Sneha ordered a black backpack online, but she received a red one instead. Her friend Ajay is impatient and wants a quick replacement, while Rohan prefers a full refund. Meanwhile, Shruti is curious about how to prevent such mistakes in future orders. The team visits the store and discusses their options with the store representative, trying to resolve the issue smoothly.

3. Scenario 3: Ordering Food at a Restaurant

Use Case:

Your team is visiting a restaurant. Each member has different preferences (vegetarian, non-spicy, allergic to nuts). The team must place an order correctly by interacting with the waiter.

4. Scenario 4: Making a Doctor's Appointment

Use Case:

Rahul has been feeling unwell and needs to schedule a doctor's appointment. His friend, Meera, helps him call the clinic, while Arjun asks if there is a specialist available. Priya inquiries about appointment costs, and Suresh asks about the nearest pharmacy for medicine. The group gathers all necessary information and ensures Rahul gets an appointment with the right doctor.

5. Scenario 5: Borrowing a Book from the Library

Use Case:

A group of students needs to borrow books from the college library. Rahul is looking for a specific book for an assignment, Priya wants to renew her borrowed book, Arjun needs help finding books on a topic, Sneha forgot to return her overdue book, and the librarian helps them with their requests.

Level 4 to Level 7 - Intermediate Proficiency

1. Scenario 1: Planning a Group Trip

Your team is planning a one-day trip to a nearby city. You need to decide where to go, how to travel, what to eat, and how to divide costs. Everyone has different preferences, and you must come to a final decision as a group.

2. Scenario 2: Helping a Tourist in Your City

A foreign tourist is visiting your city and is confused about where to go and what to eat. Your team must suggest places, explain how to reach them, and recommend local

3. Scenario 3: Resolving a Roommate Dispute

Your group shares a hostel room, and there is a conflict about cleanliness and noise levels. One roommate plays loud music, another leaves a mess, and others find it hard to study. The team must discuss and agree on house rules.

Level 8 to Level 10 -Advanced Proficiency

1. Scenario 1: Planning a College Festival

Your college is organizing an annual festival, and your team is in charge. You need to decide on the main events, budget, and promotions while considering everyone's ideas.

2. Scenario 2: Public Speaking on Social Media's Impact

Your group must present a discussion on the positive and negative impacts of social media in today's world.

Overview of English Language Communication First Year Final Exam Instructions to the Master Assessors (External Examiners)

Objective: The final exam aims to assess students' English proficiency through real-life scenarios. Students will be categorized into different proficiency levels based on their LMS performance. The Master Assessor will use the LMS data to group students accordingly and conduct the assessment as a group activity.

Assessment Process:

1. Student Categorization:

- Students will be divided into three proficiency levels:
 - Level 1 to Level 3 (Basic Proficiency)
 - Level 4 to Level 7 (Intermediate Proficiency)
 - Level 8 to Level 10 (Advanced Proficiency)
 - Grouping will be done based on their LMS scores and previous performance.

2. Exam Format:

- The assessment will be conducted as a group activity.
- Each group will be assigned a scenario based on their proficiency level.
- Students must engage in role-play or discussion to demonstrate communication skills.

3. Scenario Allocation:

- Basic Proficiency (Level 1-3): Everyday conversations and practical communication scenarios.
- Intermediate Proficiency (Level 4-7): Situations requiring negotiation, problemsolving, and teamwork.
- Advanced Proficiency (Level 8-10): Complex interactions, debate, conflict resolution, and public speaking.

4. Assessment Criteria:

- Examiners will assess students based on the rubric provided in the score sheet.
- Key criteria include:
 - · Fluency and Pronunciation (Clarity, coherence, and confidence in speech)
 - Grammar and Vocabulary (Use of appropriate words and sentence structures)
 - Listening and Comprehension (Ability to understand and respond accurately)

- Interaction and Engagement (Participation, teamwork, and communication effectiveness)
- Problem-Solving and Critical Thinking (Logical approach and creativity in responses)

5. Examiner's Role:

- Ensure students understand the scenario before starting.
- Observe and evaluate interactions based on assessment rubrics.
- Provide minimal intervention; let students lead the conversation.
- Score students individually and as a group.
- Offer constructive feedback after the session.

Conducting the Assessment:

- Brief the students on the activity and assessment criteria.
- Allow preparation time (5 minutes) for students to discuss their roles.
- Conduct the scenario-based assessment (10-15 minutes per group).
- Record observations and scores based on the rubric.
- Provide individual and group feedback.

7. Scoring and Reporting:

- Use the standardized rubric to grade students.
- Submit the score sheet along with qualitative feedback for each student.
- Identify students needing additional support and recommend follow-up training if required.

Important Notes:

- The exam aims to encourage practical communication rather than rote memorization.
- Students should be given an opportunity to speak without excessive correction.
- Constructive feedback should be provided to help students improve.
- Any disputes or special cases should be recorded and reported to the Master Assessor.

Data Analytics & Visualization

Total Marks: 75

Time: 3 hours

Assessment Pattern:

Total: 75 Marks

Project Presentation & Report Submission	50 Marks	
Problem statement	10 Marks	
Viva Voce Evaluation	15 Marks	

Section - A

50 marks

(Project Completion 30 Marks + Presentation & Report Submission -20 marks)

Note: Students Would have completed any one of the below projects in the course curriculum given by Naan Mudhalvan. External assessors need to assess the output, tools utilized, documentation, and presentation (in any mode) of the project completed by the student.

SL.NO	FINAL PROJECT			
1	Goods Receipt Note Confirm and document the receipt of goods into the warehouse, ensuring accurate inventory records and timely updates for efficient tracking and stock management.			
2	Delivery Receipt Document and track the delivery of goods from the warehouse, providing detailed insights into conditions, quantities delivered, and ensuring accountability in the supply chain.			

3	Sales Performance Dashboard Create an interactive dashboard to monitor and evaluate sales trends across regions and product categories, enabling decision-makers to identify high-performing areas and optimize strategies.
4	Customer Segmentation Analysis Develop a data model to segment customers based on purchase behavior and demographic attributes, providing actionable insights for targeted marketing campaigns.
5	Inventory Forecasting System Design a forecasting tool to predict inventory needs based on historical sales data and seasonal trends, ensuring optimal stock levels and minimizing overstock or stockouts.

Section - B

Problem statement

 Using the data set with Inventory details of goods in the Amazon warehouse, Create a dashboard

Tools: Excel/ Power BI/tableau

Data Set:

Objective:

- Provide a report on the Value of the product in warehouse
- Report on Product details and tracking with date and time
- Report on Stocks in the warehouse with respect to date [overall warehouse stock record]

Assessment Rubrics:

- Presentation & Communication 5 Marks

Viva Voce Questions & Answer Keys - (Ask any 5 questions out of 10)

1. What does the VLOOKUP function do?

Answer: VLOOKUP searches for a value in the first column of a range and returns a value from another column.

2. What is the difference between VLOOKUP and HLOOKUP?

Answer:

VLOOKUP searches vertically in a column.

HLOOKUP searches horizontally in a row.

3. What is Power BI?

Answer: Power BI is a business intelligence (BI) tool by Microsoft that allows users to connect, visualize, and share data insights through interactive reports and dashboards.

4. What are the key components of Power BI?

Answer (any two)

- Power BI Desktop: Used for creating reports and data models.
- Power BI Service: A cloud-based platform for sharing reports.
- Power BI Mobile: Enables access to reports on mobile devices.
- Power Query: Data transformation and cleaning tool.
- Power Pivot: Data modeling and DAX calculations.

5. How can you share Power BI reports?

Answer:

- Publish to Power BI Service.
- Embed in SharePoint, Teams, or Websites.
- Export to PDF, PowerPoint, or Excel.
- Use Power BI Apps for enterprise sharing.

6. What is SQL?

Answer: SQL (Structured Query Language) is a programming language used to store, retrieve, manipulate, and manage data in relational databases.

7. What are the different types of SQL commands?

Answer: (any two)

- DDL (Data Definition Language): CREATE, ALTER, DROP, TRUNCATE
- DML (Data Manipulation Language): INSERT, UPDATE, DELETE
- DQL (Data Query Language): SELECT
- DCL (Data Control Language): GRANT, REVOKE

- TCL (Transaction Control Language): COMMIT, ROLLBACK, SAVEPOINT
- 8. What is the difference between a workbook and a worksheet in Excel? Answer:
 - Workbook: A file that contains multiple worksheets.
 - Worksheet: A single sheet within a workbook that holds data.
- 9. What are Pivot Tables, and how are they useful?

Answer: A Pivot Table is an Excel feature used to summarize, analyze, and present large datasets dynamically. It allows users to:

- · Group and filter data
- Calculate totals and averages
- · Create summary reports
- 10. What is Power Query in Excel?

Answer: Power Query is an ETL (Extract, Transform, Load) tool used for data cleaning and transformation before analysis.

Example Uses:

- Removing duplicates
- Splitting or merging columns
- Importing data from different sources

SUSTAINABILITY & GREEN CHEMISTRY IN EV SECTOR

Course Description:

About the Course: This course explores the foundational concepts, technologies, and applications of sustainable energy within the context of electric vehicles (EVs) and chemical engineering, emphasizing renewable energy systems, energy efficiency, and their role in sustainable development. It delves into the transition from fossil fuels to renewable energy sources, advanced battery technologies for EVs, and the integration of renewable energy into EV charging infrastructure. The principles of green chemistry are examined to promote cleaner, more efficient chemical processes, sustainable materials for EVs, and eco-friendly alternatives in industrial applications. By focusing on energy efficiency, life cycle analysis, and global sustainability initiatives, the course highlights how innovations in sustainable energy and green chemistry contribute to mitigating climate change, supporting a circular economy, and fostering energy equity for a sustainable future.

	Table 1
OVERALL COURSE OBJECTIVE:	 Examine advanced analytical techniques to evaluate and interpret their applications in food testing. Design precise methodologies for conducting proximate and nutritional analysis using advanced tools and techniques. Appraise methods for ensuring food safety and quality, emphasizing microbiological and sensory evaluation. Enhance laboratory practices by innovating procedures and adhering to rigorous quality control standards.
	5. Devise comprehensive quality control strategies to address challenges in the food production sector effectively.

LEARNING	Critique various food analysis methodologies,
OUTCOME:	assessing their applicability to specific food types and justifying their selection based on theoretical principles.
hito	Synthesize advanced techniques for proximate and nutritional analysis, ensuring precision and adherence to standard operating procedures.
	Validate food safety and quality through critical evaluation of microbiological safety results and sensory analysis techniques.
	 Optimize laboratory operations by refining skills in equipment maintenance and ensuring accuracy in quality control practices.
	5. Formulate and propose innovative quality assurance

LEARNING OUTCOME	ASSESSMENT CRITERIA	Performance Criteria	USE CASES
Evaluate methodologies for food analysis	Written assessments, quizzes	1. Compare different analytical techniques based on their applicability to specific food types. 2. Outline the principles underlying chosen methodologies.	Case study on selecting appropriate food analysis methodologies for specific food categories.
Apply techniques for food composition analysis	Laboratory practical assessments	 Implement proximate and nutritional analysis with precision. Demonstrate consistency in the use of standard operating procedures during tests. 	Nutritional analysis of selected food items in a controlled laboratory setting.
Judge food safety and quality through advanced analysis	Evaluation of mock samples	1. Validate the accuracy of microbiological safety results. 2. Argue the effectiveness of sensory analysis techniques applied to food samples. .	Quality assessment of mock food samples through microbiological and sensory analysis techniques.
Demonstrate precision in laboratory skills	Laboratory skill assessments, practical tests	1. Operate and maintain laboratory equipment effectively. 2. Conduct tests with minimal errors, adhering to quality control standards.	Quality control procedures for ensuring accuracy in food analysis results.

Propose solutions to enhance quality control in food analysis Project presentations, problem-solving exercises	 Design a comprehensive quality control program tailored to food production needs. Recommend improvements for existing quality assurance processes. 	Designing a robust quality control program tailored to the needs of a food production scenario.

TABLE 4	TABLE 4: LIST OF FINAL PROJECTS (PROJECTS THAT COMPREHENSIVELY COVER ALL THE LEARNING OUTCOME)				
SL.NO	FINAL PROJECT				
1	Development of a comprehensive food analysis handbook for various food categories				
2	Case study analysis on the application of different analytical techniques in food analysis				
3	Implementation of quality control measures in a mock food production scenario				
4	Research project on emerging analytical methods in food analysis and their efficacy				
5	Creation of a nutritional guide with analyzed data for diverse food products				
6	Presentation on modern trends and innovations in food analysis techniques				
7	Analysis of food safety and quality parameters using real food samples				
8	Statistical analysis of food composition data and interpretation of results				
9	Development of a report on food analysis findings and recommendations				

10	Case-based assignments demonstrating various food analysis techniques
11	Proposal for implementing quality assurance measures in a food production setting
12	Simulation of practical exercises for food composition analysis
13	Research paper on the significance of sensory analysis in food quality assessment
14	Presentation on the impact of technological advancements in food analysis
15	Business strategy development for a food analysis laboratory
16	Case studies showcasing challenges and solutions in food analysis applications
17	Design and execution of a quality control program for food analysis
18	Financial plan outlining investment strategies for enhancing food analysis techniques
19	Project evaluating the feasibility of integrating sustainable practices in food analysis
20	Creation of a comprehensive report on advancements and challenges in food analysis

TRINITY COLLEGE FOR WOMEN, NAMAKKAL NAAN MUDHALVAN (2024-25)

FOOD ANALYSIS - FOOD PROCESSING AND PRESERVATION METHODS

Under the auspices of Naan Mudhalvan, Trinity College for Women, Namakkal conducted the programme titled "Food Analysis - Food Processing and Preservation Methods" on 24th January, 31st January, 07th February, 28th February, 10th March, 27th March, 28th March, 02nd April and 04th April 2025.

Ms. P. Divya Bharathi, Trainer, Rare Minds, Bengaluru was the resource person.

She explained the food processing techniques, viz, methods of food processing, ways to extend shelf life, analysis of nutrients, additives, contamination in food, preservation of food techniques (such as freezing, drying and canning), innovation in food processing to enhance the food taste, need of nutritious foods, want of storage of food, etc.,

Ms. R. Rupa, Assistant Professor & Head & Ms. P. Sri Renugadevi, Assistant Professor in Nutrition & Dietetics, Trinity College for Women, Namakkal, also took part on that occasion.

Naan Mudhalvan Programme – Data Analytics & Visualization and Advanced Data Analysis & Visualization

Under the auspices of Naan Mudhalvan, Trinity College for Women, Namakkal conducted a programme titled "Data Analytics & Visualization and Advanced Data Analysis & Visualization" on 4th February, 18th February, 25th February, 04th March, 11th March, 18th March, 25th March, 28th March and 01st April 2025. Ms. M. Saranya Selvaraj, Data Analyst, Curious Crew, Attaiyampalayam, Sembinallu, Avinashi, Tiruppur district was the resource person.

She explained various topics, like the introduction of analytics, the basics of Excel, formulas and functions of Excel, pivot tables, charts, dashboarding in Excel, fundamentals of SQL (Structured Query Language), Power Business Intelligence Fundamentals, executive reporting, etc.

Mrs. V. Kalaivani, Assistant Professor in Physics and Mrs. S. Madhukaraveni, Assistant Professor of Mathematics, made the arrangements. Second year and third year undergraduate Physics and Mathematics benefited through that programme.

Section - A

50 marks

(Project Completion 30 Marks + Presentation & Report Submission -20 marks)

Note: Students Would have completed ANY ONE of the below projects in the course curriculum given by Naan Mudhalvan. External assessors need to assess the output, tools utilized, documentation, and presentation (in any mode) of the project completed by the student.

SL.N O	FINAL PROJECT
	der I.
L	Clean and analyse retail sales data to identify missing values and remove outliers.

3	Develop a causal graph to explain the impact of marketing campaigns on customer retention.
4	Design an interactive dashboard for a small business to monitor key performance metrics.
5	Analyze the performance of an ad campaign and suggest actionable improvements.
6	Use SQL to extract sales data for a specific region and present aggregated results.
7	Build a predictive model to recommend the best-selling products for a retail store.
8	Develop a story-driven presentation explaining business outcomes based on data analysis.
9	Integrate multiple data sources and create a consolidated analytics report.
10	Validate data quality for a company's internal operations and identify inconsistencies.

Section - B

Problem statement

Scenario 1.

Using the data set provided by the HR of steel manufacturing Industry. He wants to track employee attendance, analyse patterns of absenteeism, late arrivals, and early departures, and use advanced data visualization to improve workforce management on monthly bases. Using Excel (PivotTables, Conditional Formatting) and SQL.

Objective:

- Provide the pivot table and analysis the Attendance trends
- KPI Dashboard with Key Metrics: Total Employees Present vs. Absent, Average Check-in and Check-out Time

Assessment Rubrics:

- Presentation & Communication 5 Marks [Clarity of Explanation(2
 M), Visual Aid & Documentation (2M), Confidence & Delivery (1M)]
- Techniques utilisation (Pivot table; SQL; charts; etc) 5 Marks
 [Use of Advanced Technologies (3M), Uniqueness of Idea (2M)]
- Dashboard design & Visualisation 5 Marks
 [Work Model (3M), Understanding of Concept (2M)]
- Innovation & Creativity 5 Marks

Viva Voce Questions & Answer Keys - (Ask any 5 questions out of 10)

- 1. Which of the following is NOT a type of data analytics?
- A) Descriptive Analytics
- B) Predictive Analytics
- C) Prescriptive Analytics
- D) Illustrative Analytics

Answer: D) Illustrative Analytics

2. What is Advanced Data Analytics?

Answer: Advanced Data Analytics involves using statistical, machine learning, and visualization techniques to extract insights from complex datasets.

3. What is Data Visualization?

Answer: Data visualization is the process of **representing data graphically** using charts, graphs, and dashboards to make information easier to understand.

4. Why is data visualization important?

Answer: It helps in identifying trends, patterns, and outliers quickly, making decision-making more effective.

5. What is a Dashboard in Data Analytics?

Answer: A dashboard is an interactive report that displays charts, graphs, and key metrics to help users monitor performance and trends.

6. What is Predictive Analytics?

Answer: Predictive analytics uses historical data and machine learning to forecast future outcomes.

7. What is a KPI in Data Analytics?

Answer: KPI (Key Performance Indicator) is a measurable value that indicates how well an organization is achieving its goals. Example: Sales growth, customer retention, or website traffic.

8. What is the role of SQL in Data Analytics?

Answer: SQL is used to **store**, retrieve, filter, and manipulate large datasets in databases for analysis.

9. What is the difference between Bar Chart and Line Chart?

Answer:

Bar Chart is used for comparing different categories. **Line Chart** is used for showing trends over time.

10. What is Power BI used for?

Answer: Power BI is a business intelligence tool that helps create interactive dashboards, reports, and real-time data analysis for decision-making.

<EV Battery Management System >

Course Description:

The **EV Battery Management System (BMS) course** provides in-depth knowledge of battery technologies used in electric vehicles. Participants will learn about battery design, monitoring, charging algorithms, thermal management, and safety protocols. The course equips learners with the skills to design, test, and optimize BMS for efficient EV performance and longevity.

Course Objectives	Skill Competency Outcome

Application: (*Limit to 50-100 words*)

1	Purpose of course:	The purpose of the EV Battery Management System (BMS) course is to equip participants with essential knowledge and practical skills in designing, monitoring, and managing battery systems for electric vehicles. It focuses on battery chemistry, charging algorithms, thermal management, and safety protocols, preparing learners for roles in EV technology and innovation
2	Industry Specific applications:	The EV Battery Management System (BMS) is widely applied in industries such as electric vehicle manufacturing, energy storage systems, renewable energy, and aerospace. It ensures efficient battery performance, safety, and longevity by managing charging, discharging, and thermal processes. BMS plays a key role in optimizing battery life across diverse applications.
3	Job Roles:	□BMS Engineer □Battery Systems Engineer □Power Electronics Engineer □Thermal Management Engineer □Quality Assurance Engineer (BMS) □Battery Testing Specialist □BMS Software Developer
4	Career Path:	After completing the EV Battery Management System (BMS) course, professionals can start as BMS Engineers or Battery Systems Engineers. With experience, they can advance to roles like Power Electronics Engineer, Thermal Management Engineer, or BMS Software Developer. Senior positions include Lead Engineer, Technical Manager, or Director in EV or energy storage sectors.

Course Competency Field (Aligned with Industry Needs):

	Participants will gain in-depth knowledge of EV battery
	technologies, BMS architecture, charging algorithms,
	thermal management, and safety protocols. They will
Knowledge Competency	understand battery performance monitoring, state-of-charge
	(SOC) estimation, and fault detection, enabling them to
	design, optimize, and troubleshoot BMS systems for
	electric vehicles and energy storage applications.
	Participants will develop the ability to design, test, and
	optimize EV Battery Management Systems (BMS) for
	efficient performance. They will be skilled in programming
Skill Competency (Performance)	BMS software, implementing charging/discharging
	algorithms, managing thermal systems, and diagnosing
	faults, ensuring reliable battery operation, safety, and
	longevity in electric vehicles and energy storage systems.
	Participants can pursue international certifications such as
	the Certified Battery Management System (BMS)
	Professional or Certified Energy Storage Professional
Additional Competency (Any	(CESP). These certifications validate expertise in BMS
International Certifications)	design, energy storage systems, and electric vehicle battery
	technologies, enhancing career prospects in global markets
	and providing recognition of advanced technical
	competency in the EV industry.

SYLLABUS

Green Skills & Advance Machine Learning using Python 6 Days Workshop - Agenda

Days	Topic Description	Duration (in hrs)
	FDP Baseline assessment	
Day 1	Introduction – Workshop Agenda, Objective Green skilling and Sustainability Overview of sustainability: Definitions and Importance. Green skilling and its importance in the context of sustainability. Green Entrepreneur	4
	Data Analytics with Python	
	Numerical Python - NumPy Dender (Date Manipulation and date analysis)	
	 Pandas (Data Manipulation and data analysis) Machine Learning Algorithms 	
	Introduction – Machine Learning – Supervised,	
Day 2	unsupervised ML	4
	 Linear Machine learning model (linear regression/ logistic regression and it's Evaluation matrices). 	4
	 Non-Linear Model (SVM) 	
	Machine Learning Algorithms	
	 Dimensionality Reduction Techniques (PCA) DBSCAN Ensemble Machine learning 	
Day 3	<u> </u>	4
	 Neural Networks – Neurons, Loss Functions, Weights Gradient Descent and Back propagation Convolutional Neural Network 	
	Computer Vision – With Open cv	
	and Keras Hands-on session on	
		4
Day 4	Computer vision	
	Canny edge detection Viola large Algorithm for food detection	
	Viola-Jones Algorithm for face detectionFace detection	
	Full body detection	
	Number plate detection	
	Generative AI and LLM	
Day 5	 Overview of Large Language Models (LLMs) and their capabilities. Exploring pre-trained models like GPT-3/4 and their applications. 	4
	FDP Post assessment and Feedback
